# WHAT IS AGILE

Imagine you and your friends want to build a really cool treehouse together

want to build

You have a big plan in your mind of how you want it to look, but you know that it might change a little bit along the way

Initial Plan

Final Product

Agile is like a way of building your treehouse that helps you work together and make changes easily.

# Planning Phase

PM

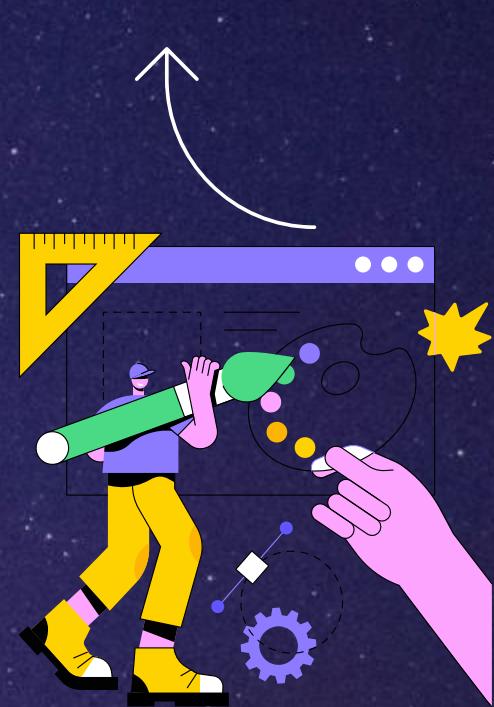

Tester

Developer

UI/UX

Sets project goals and coordinates the team

Provides input on safety considerations and usability

Collaborates on technical aspects.

Creates a vision for the treehouse's look and user experience

# Building the Base

PM

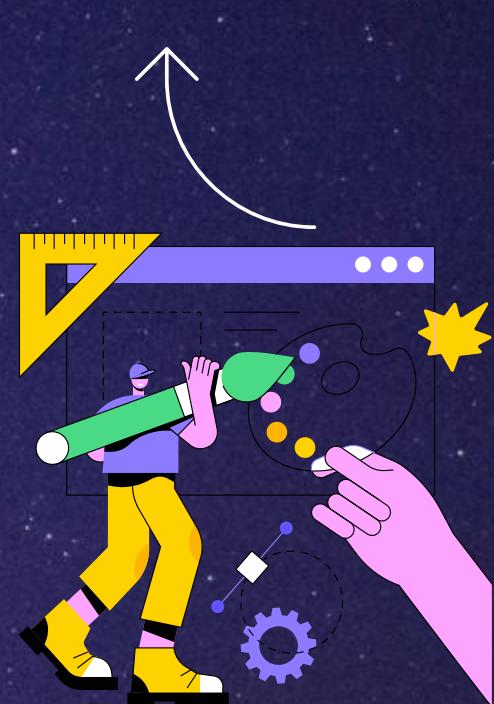

Tester

Developer

UI/UX

Oversees the development process and coordinates tasks.

Inspects the base for safety and structural stability.

Constructs the base of the treehouse

Considers user experience, suggests child-friendly features, and ensures accessibility.

# Building the Walls

PM

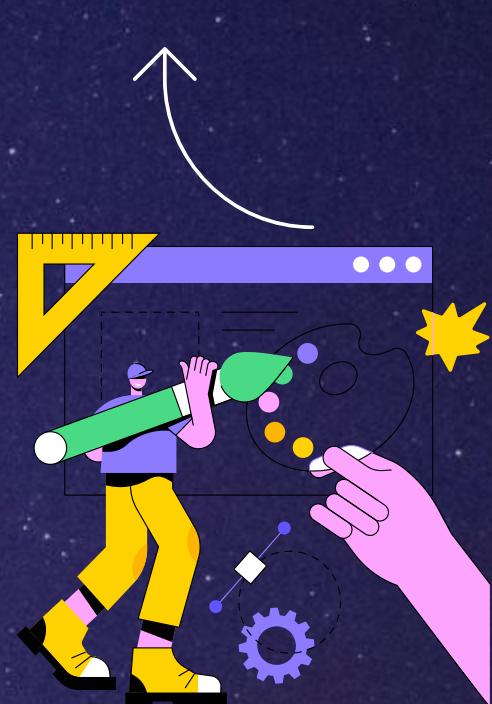

Tester

Developer

UI/UX

Coordinates the developers' work and addresses challenges.

Inspects the walls for safety and functionality.

Constructs the walls of the treehouse.

Considers user interface, suggests window and door placement, and enhances user experience with design elements.

# Building the Roof

PM

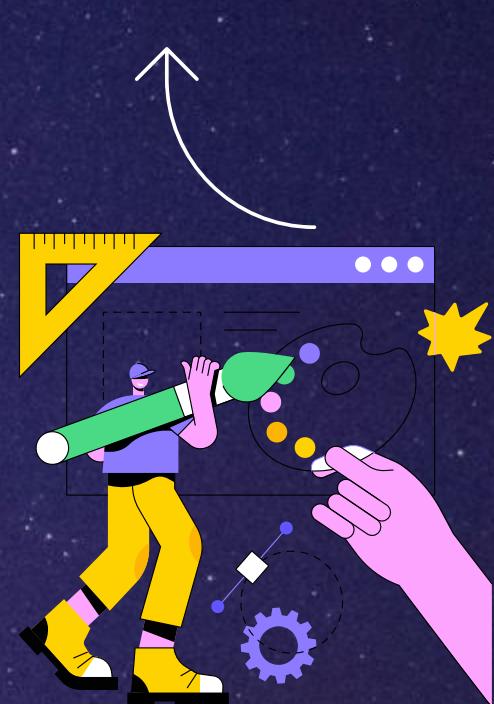

Tester

Developer

UI/UX

Ensures smooth workflow and addresses concerns.

Inspects the roof for safety and weatherproofing.

Constructs the roof of the treehouse.

Considers user experience, suggests elements like skylights or covered areas, and ensures the roof design complements overall aesthetics.

# Testing and Final Adjustments

PM

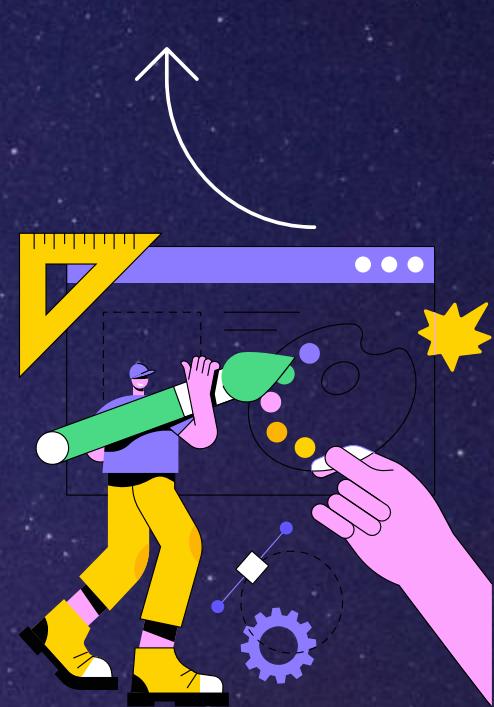

Tester

Developer

UI/UX

Coordinates team efforts to address identified issues.

Conducts comprehensive inspection for safety and usability.

Makes adjustments based on tester's feedback.

Collaborates to enhance user experience, suggests improvements to layout, signage, and interactive elements.
